

## **About embedUR**

**embedUR systems** ([www.embedUR.ai](http://www.embedUR.ai)) is a leading embedded technology company headquartered in Silicon Valley, with a presence in Chennai.

Established in 2004, the company, through its expertise has enabled its customers to launch products and solutions and provide support across markets. In the last two decades, the company has grown to be partner-of-choice for many of its clients, enabling them to increase their product offerings and exceed their financial goals.

Specifically, the organization has a strong foothold in the telecom and networking industry, serving some of the industry's largest equipment vendors and service providers across the globe.

An expert in IoT, networking, cloud and AI, the company has leveraged its time-honed, bleeding-edge and unique capabilities to develop complex connectivity products and solutions across verticals including service provider, enterprise, industrial, medical, automotive, and more.

embedUR's solutions have been deployed in millions of devices across the world and benefit a global customer base that includes Fortune 500 companies.

As a self-funded organization, embedUR has sustained continuous annual growth and prides itself on its 100% client retention record. The company operates two R&D centers and a dedicated team of 350+ employees, facilitating faster market entry and improved margins for clients through their embedded technology prowess.
